

Transponder Location for Legends

The transponder shall be mounted on the 1"x 2" Cross member nearest to the fuel tank.

The transponder will be mounted towards the right frame rail.

The transponder **MUST** be mounted with the silver side down facing the track surface.

The transponder **MUST** have a clear view of the racing surface.

If hard wired:

The transponder will be hard wired to the ignition switch. Do **NOT** put them on a separate switch. If you forget to turn the switch on, you will not be scored. Wiring them to the ignition switch insures they will not inadvertently be turned off and the result in a disqualification.

The amp draws on these units is minimal and should pose no concerns for any racecar.

They have been powered by nine-volt batteries in certain applications.
